Asphalt work continues on Frank Phillips Boulevard

Work continues on the Frank Phillips Boulevard improvements project in downtown Bartlesville — with the asphalt overlay portion set to begin early Thursday morning.

Contract crews will begin laying asphalt on the south side of Frank Phillips Boulevard at Keeler Avenue, continuing east to Cherokee Avenue before completing the north side of the road and side streets in the area.

Lane closures are expected during the project, but one lane will remain open to traffic at all times. This portion of the project is expected to be complete this weekend.

"If you are able to utilize alternate routes during this time, we encourage you to do so," said Terry Lauritsen, director of Engineering. "While the roadway will remain open during these construction activities, delays should be expected."
