

Download the Pipeline Awareness Viewer™ app for important land use and property development information. Use PAV to learn about:

- The PIMMA application and apply for access

- Land use planning and transmission pipelines

- The 811 process

- How to recognize a pipeline leak

- The different types of pipelines

- How to recognize the location of a pipeline

- Take online survey

How to use PAV:

See the next page for more description and video link

- Launch the app.
- Point your device at the image to the left “City Hall” and tap the screen to
- Once the content is revealed, tap the pop-out button  to freeze the content on your screen.
- Tap the buttons to view important videos or to visit websites about pipeline safety.

**For best results, enable Wi-Fi on your device before using PAV. Windows Phone® and BlackBerry® devices are not supported at this time.*

Description

Paradigm's Pipeline Awareness Viewer™ (PAV) was designed to provide additional safety messaging directly to your Smartphone or tablet about pipelines, a safe and reliable means of transporting energy products. Look in your mailbox for public awareness materials (brochures, postcards) with the PAV logo, sent by pipeline operators in your area that have been enhanced with digital content pursuant to API RP1162 and 49 CFR parts 192 and 195, such as:

- Videos
- Images
- 3D content
- Public awareness communication in foreign languages (depending on the brochure)
- Links to websites for additional information
- Online surveys to test your knowledge of pipelines and pipeline safety.
